About this Document

The BDNA User Console 5.5.0 Release Notes provide an overview of the newest updates included with the BDNA User Console. The User Console is deployed as part of the Data Platform installation process. The BDNA User Console 5.5.0 Release Notes contain the following information:

- [Deploying the User Console 5.5.0 Release \(Full Installer\)](#)
- [New Features](#)
- [Change Requests](#)

For more information on the User Console, please see the User Console Installation and User Guides. You can also reference the Data Platform 5.5.0 Release Notes for similar information regarding the 5.5.0 release.

Note • There are two different methods for installing or upgrading to 5.5.0, either via the full installer or the patch set method (as shown below). For more information regarding which option works best for you, please see the Support Knowledge Base for further details about full installer and patch set suggestions.

Deploying the User Console 5.5.0 Release (Full Installer)

A full installer is available for 5.5.0 Data Platform and User Console. For more detailed information regarding the 5.5.0 installation, please consult the Data Platform 5.5 Installation Guide and the User Console 5.5 Installation Guide. BDNA also provides a BDNA Normalize Migration Wizard that allows users to backup their previous settings (i.e. on 5.2x, 5.3x, 5.4x) and to restore those settings in their new version of 5.5.0 after completing a fresh install. Settings include Normalize configurations, integration setup, and Analyze custom reports. After the migration, Normalize jobs must be rerun in order to produce the latest data.

Deploying the User Console 5.5.0 Release (Patch Set)

For patch set instructions, please see the 5.5.0 Data Platform Release Notes.

New Features

Windows 2016R2 and MS SQL Server 2016 Support: BDNA Platform supported software now includes Windows Server 2016 R2 for operating systems, and MS SQL Server 2016 (Enterprise and Standard Editions) for databases.

Change Requests

| ID | Description |
|--------------|---|
| 23839, 22166 | Windows Server and MS SQL Server 2016 are now options during installation. Previously, only 2012 and 2014 options were available. Users should eventually migrate to the 2016 instance. |

| ID | Description |
|-------|--|
| 18774 | The ENT count for specific SW entries in the IT cube has been corrected. Before, the count was not always correct in Analyze for certain cubes |
